INTERNSHIP OVERVIEW

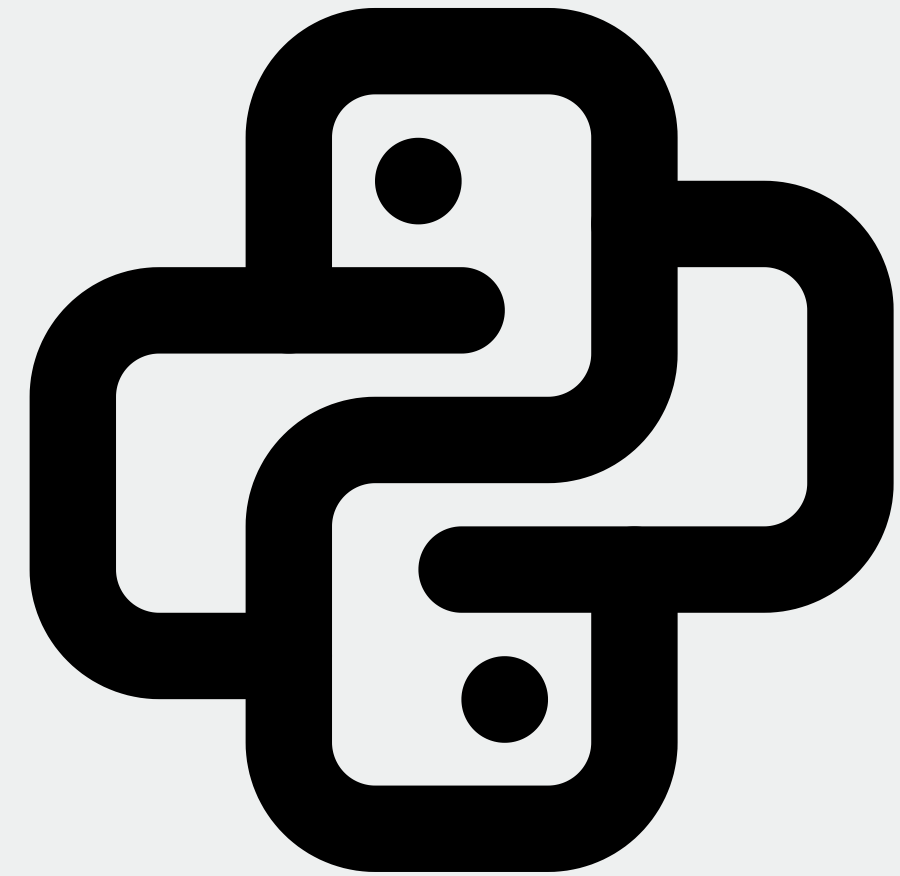

PYTHON INTERN

Duration : 27 June -25 July

Mode : Online

Main Objective: To gain practical industry experience and apply theoretical knowledge to real-world tasks.

Internship Goals and Expectations

Skill Development

**To improve and learn python coding .
To make mini projects.**

**Gain some soft skills and work
skills.**

**To develop technical and
professional skills.**

Everyday Work and assigned task

1

Python fundamentals

5

sets

2

List

6

Numpy

3

Dictionary

7

sql basics

4

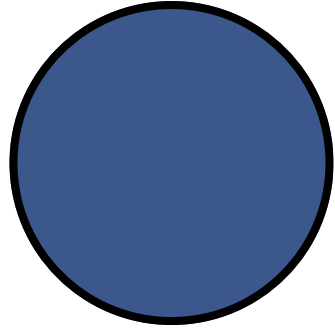

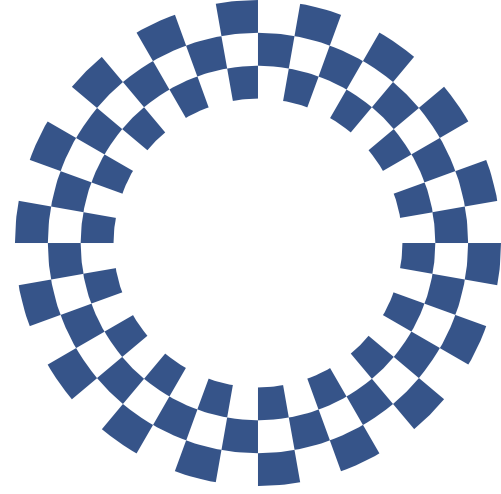

Tuples

8

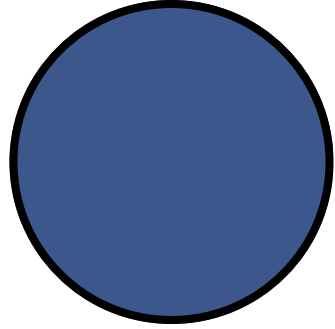

Flask

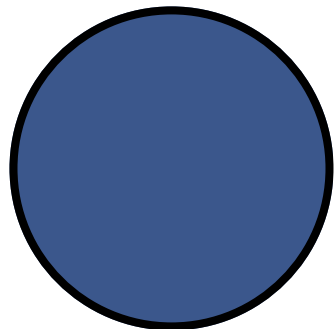

Project details

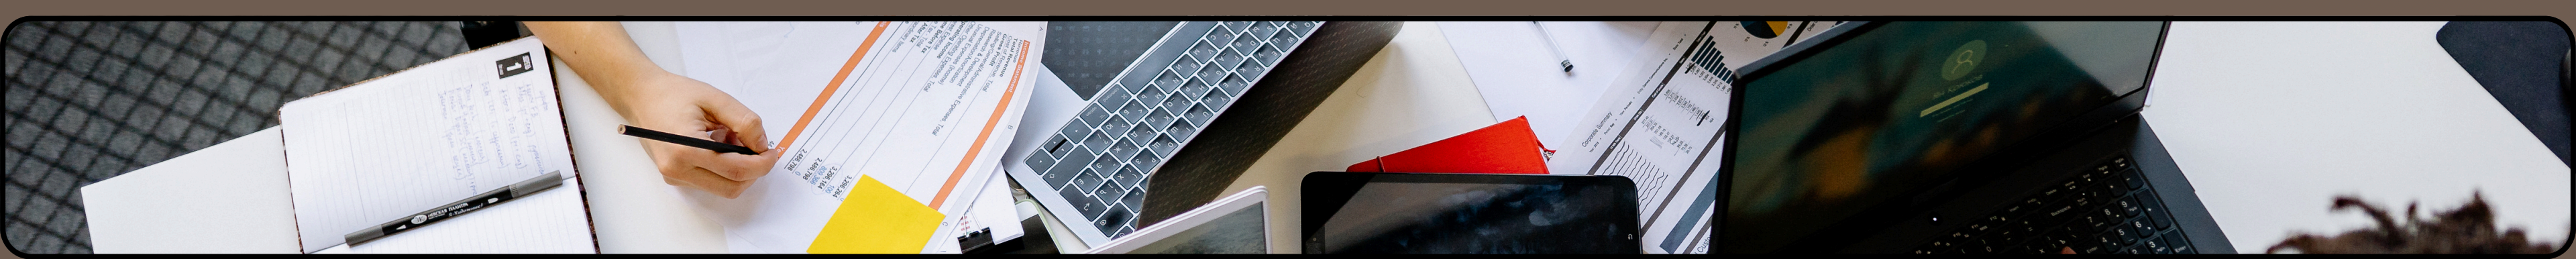

Finance app

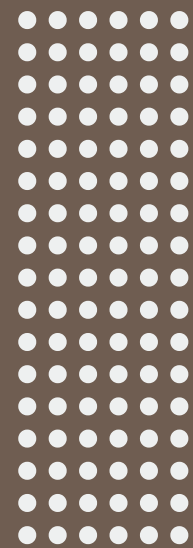

Rule based chatbot

Website

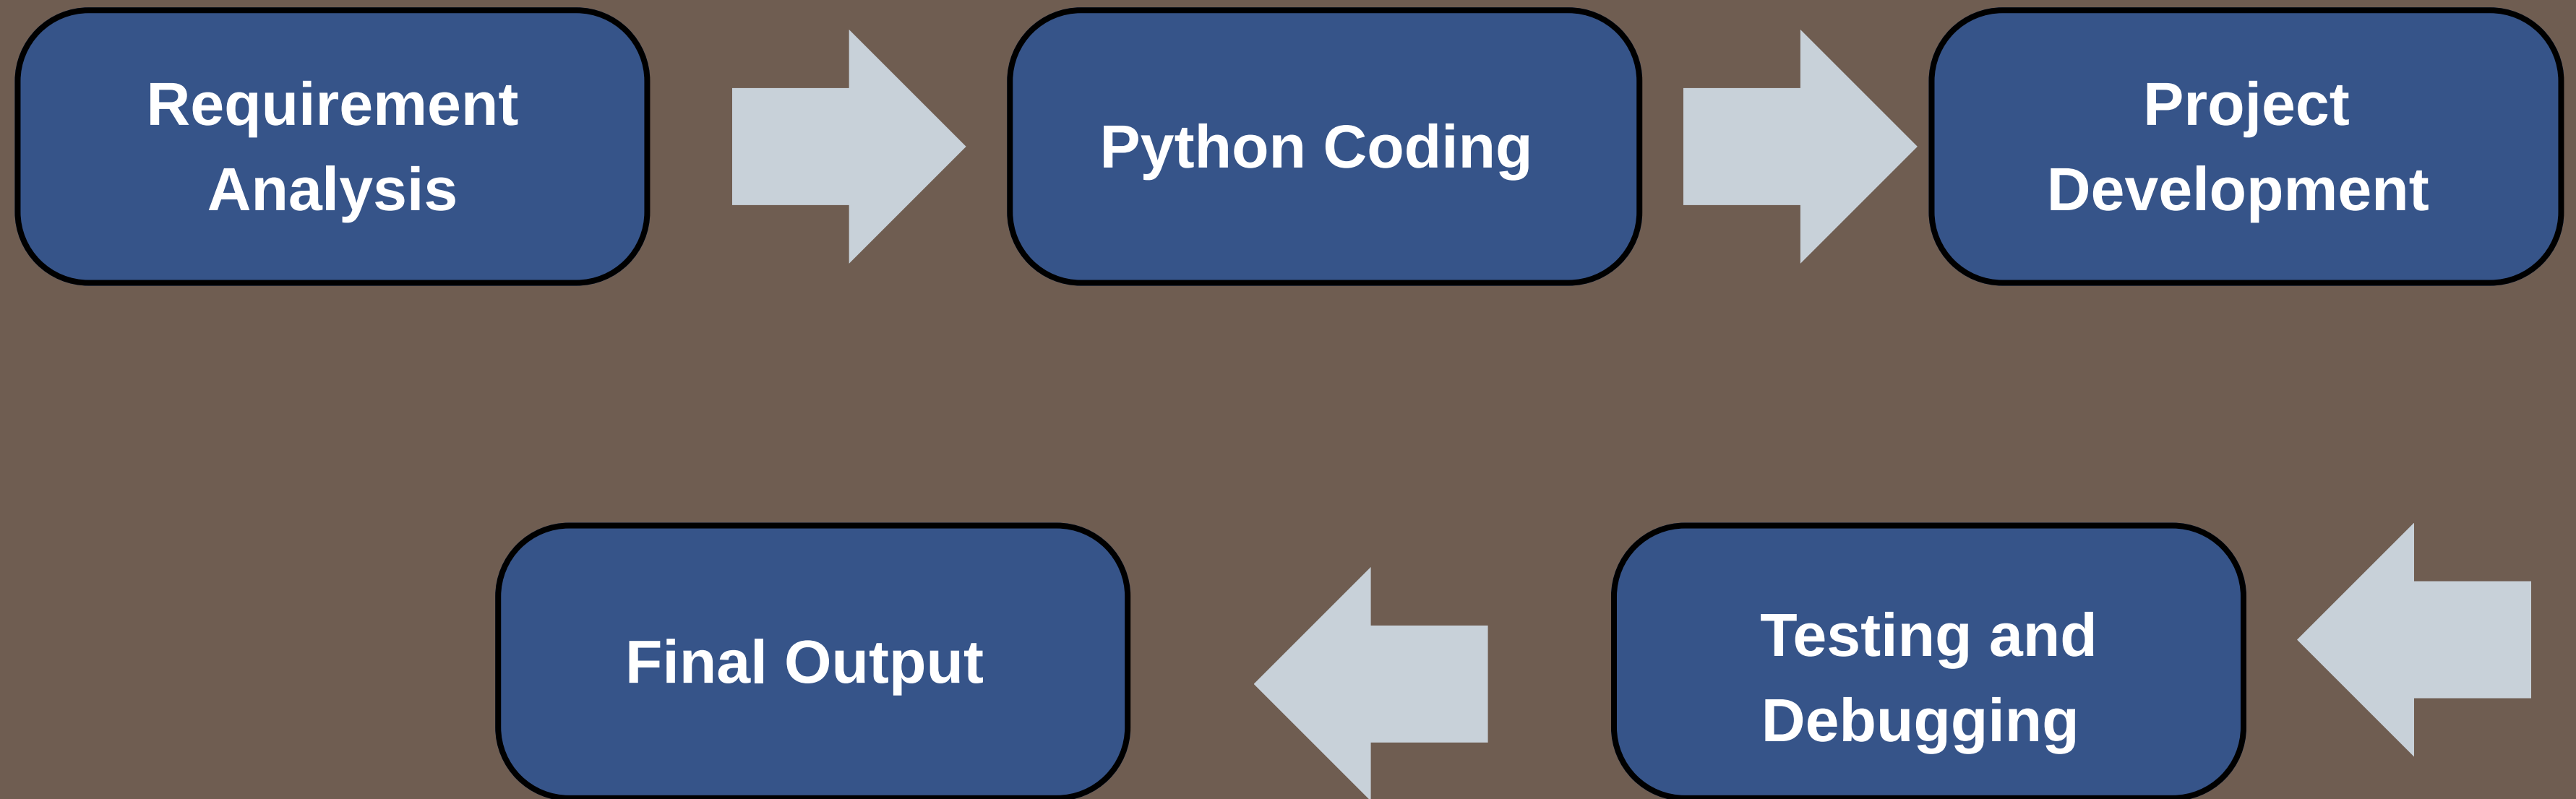

Tools and technology used

Tools

1. Vs code
- 2.Numpy
- 3.PostgreSQL
- 4.Python Programming
- 5.Flask

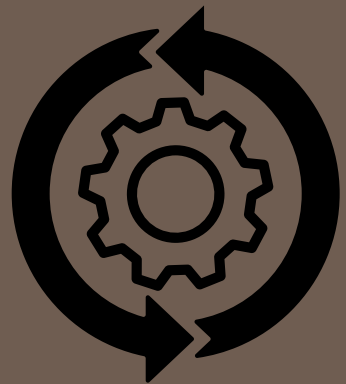

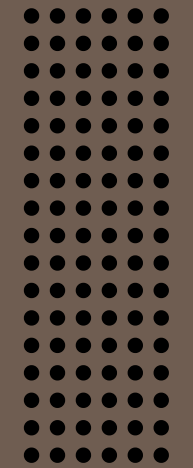

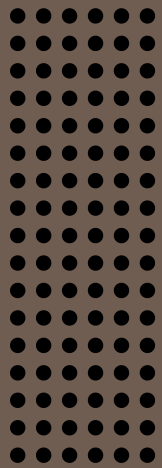

Work process and methodology

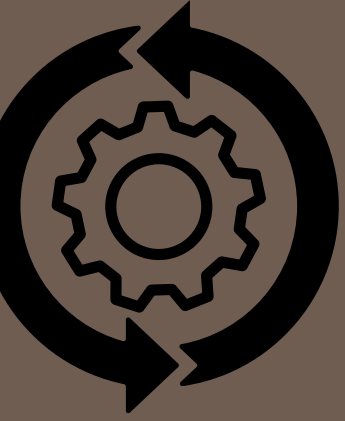

Challenges

Challenges::

- 1. Practical Python implementation**
- 2. Data Handling**
- 3. Chatbot response Handling**
- 4. Flask Integration**
- 5. Debugging and Testing**

Skills and technology learned

PYTHON programming

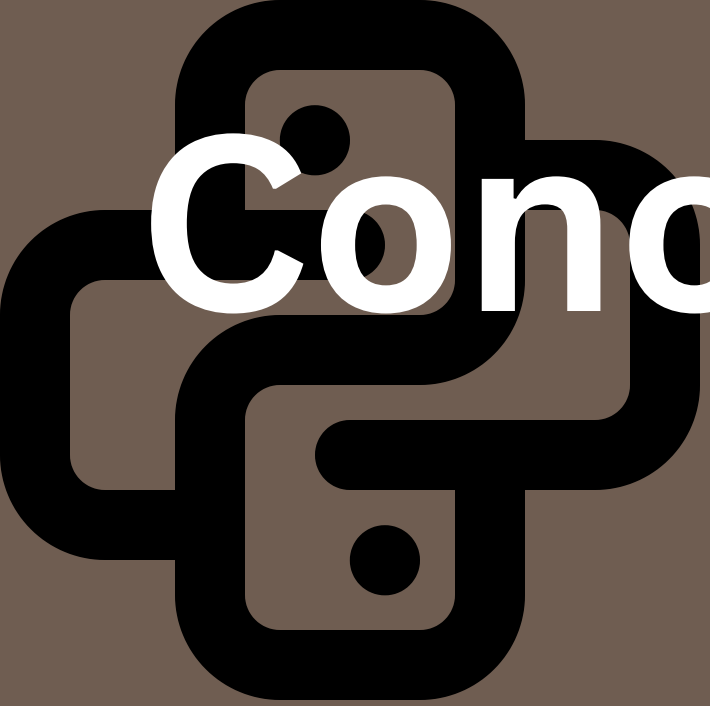

Basic data management

Flask

Numpy

SQL

Conclusion

The internship provided practical experience in Python programming and problem-solving.

I strengthened my understanding of Python concepts and data structures.

I learned to write, test and debug Python programs effectively.
The assigned tasks helped me improve my logical thinking and programming skills.

Thank you
